Chapter 1

Executive Summary

PaperHands (\$PHANDS) is an ERC-20 token launched on October 7, 2025,
at address

<https://etherscan.io/address/0x11157Da1fC6dCfd58b50ed79082183b2c6176245>

on Ethereum Mainnet. Redefining the “paper hands” meme, \$PHANDS offers high-yield staking (20% APY, 30-day lockup, 180-day cycle), 5% referral bonuses on user activity (e.g., swaps, minted as new tokens, max. 1,000 PHAND/referrer/tx), and 20% deposit bonuses for the first 5 liquidity providers (min. 1,000 PHAND swap, max. 200 PHAND bonus) in WETH/PHANDS pools (\$ 319 current liquidity, targeting \$ 5,000–\$ 50,000 short-term, \$ 100,000 long-term). With an initial 1,000,000 \$PHANDS supply (mintable for airdrops/referrals, planned to be fixed in Q2 2026 via ownership renounce), and anti-whale limits (2% max wallet, 1% max tx), the project drives adoption via airdrops (100 PHAND for the first 10 Telegram joiners). This whitepaper details the token’s mechanics, economics, and roadmap to achieve 10,000+ holders by Q3 2026. Participate in staking and incentives to build a robust community. #PaperHands2DiamondHands

Chapter 2

Problem Statement and Market Overview

Memecoins and DeFi face challenges such as whale dominance, premature selling, and insufficient retail incentives. The global cryptocurrency market exceeds \$ 2 trillion in 2025, with memecoins driving \$ 400 billion+ in volume and DeFi total value locked (TVL) at \$ 600 billion ((5), (6)). \$PHANDS targets retail traders and meme enthusiasts seeking high returns and fair access in a volatile market.

- **Market Size:** Memecoin volume: \$ 400 billion+; DeFi TVL: \$ 600 billion (Q3 2025).
- **Target Audience:** Global retail investors, meme and DeFi communities in Europe, Asia, and beyond.
- **Competitive Landscape:**

Competitor	Strength	Weakness	\$PHANDS Advantage
SHIB	Viral community	High inflation	Initial 1M supply, 20% APY
DOGE	Brand recognition	No staking	30-day lockup, high yields
PEPE	Low entry	Whale control	Anti-whale limits (2% wallet)

Table 2.1: Competitive Landscape

Chapter 3

Solution

\$PHANDS transforms memecoins by offering high staking rewards (20% APY, 30-day lockup, 180-day cycle), 5% referral bonuses for user activity (e.g., swaps, minted as new tokens, max. 1,000 PHAND/referrer/tx), and 20% deposit bonuses for the first 5 liquidity providers (min. 1,000 PHAND swap, max. 200 PHAND bonus) on WETH/PHANDS pools (<https://app.uniswap.org>: \$ 110, <https://balancer.fi>: \$ 209, targeting \$ 5,000–\$ 50,000). Anti-whale mechanics (1% max tx, 2% max wallet) ensure fairness, while airdrops (100 PHAND for the first 10 Telegram joiners) drive adoption. A dedicated staking decentralized application (dApp) and potential long-term governance exploration (2027+) empower users to earn and participate. Minting is enabled to attract new users but planned to be deactivated in Q2 2026 via ownership renounce.

Chapter 4

Technology

\$PHANDS is a Solidity v0.8.30 ERC-20 token using OpenZeppelin libraries (ERC20, ERC20Pausable, Ownable), deployed at <https://etherscan.io/address/0x11157Da1fC6dCfd58b50ed79082183b2c6176245>. A separate staking contract enables high-yield rewards and liquidity provider (LP) bonuses, verified on Etherscan.

- **Architecture:** ERC-20 with custom `_update` hooks for limits and referrals; staking contract with SafeERC20, ReentrancyGuard, Pausable.
- **Consensus:** Ethereum Proof-of-Stake (PoS) for secure, energy-efficient operations.
- **Key Functions (Token Contract):**
 - Transfers with 1% max transaction (10,000 PHAND) and 2% max wallet (20,000 PHAND, except owner).
 - Referral system: `setReferrer()` and `claimReferralBonus()` (5% bonus on user activity, e.g., swaps, minted as new tokens, max. 1,000 PHAND/referrer/tx).
 - Airdrop: Batch distribution to max. 20 addresses per call (e.g., 100 PHAND for first 10 Telegram joiners).
 - Pause/unpause for emergency control (renounceable).
- **Key Functions (Staking Contract):**
 - 30-day lockup (`LOCK_PERIOD = 30 days`).
 - 20% annual APY (`REWARD_RATE = 55`, $\sim 0.055\%$ daily, adjusted by stake ratio, 180-day cycle).
 - LP staking with 20% deposit bonus for WETH/PHANDS pools.
 - Auto-claim option for rewards.
- **Security:** Reentrancy protection, immutable limits, owner-controlled minting. Audit planned (Certik, Q1 2026).

- **Scalability:** Ethereum Mainnet (15 TPS); planned Layer 2 migration (e.g., Polygon, 2,000+ TPS) for lower fees and faster transactions.
- **Liquidity Pools:**
 - Uniswap V2/V3: WETH/PHANDS pool (~\$110 liquidity, under development, targeting \$5,000–\$50,000 short-term, \$100,000 long-term).
 - Balancer V3: WETH/PHANDS pool (~\$209 liquidity, under development, targeting \$5,000–\$50,000 short-term, \$100,000 long-term).

31         }
32     }
```

Chapter 5

Tokenomics

- **Token Symbol:** \$PHANDS
- **Total Supply:** Initial 1,000,000 \$PHANDS (18 decimals, minted at deployment), with owner-controlled minting for airdrops and referral bonuses, planned to be deactivated in Q2 2026 via ownership renounce.
- **Distribution:**
 - Community/Staking/Airdrops: 50% (500,000 PHANDS: 100 PHAND airdrops for first 10 Telegram joiners, staking rewards, community promotions/swaps).
 - Liquidity Pools: 20% (200,000 PHANDS: Uniswap/Balancer, \$ 319 current, 20% bonus for first 5 providers, min. 1,000 PHAND, max. 200 PHAND, targeting \$ 5,000–\$ 50,000).
 - Team/Reserve: 25% (250,000 PHANDS, 24-month vesting for founder).
 - Ecosystem/Marketing: 5% (50,000 PHANDS: additional airdrops, promotions, community incentives).
- **Utility:**
 - Staking: 20% APY for 180 days, 30-day lockup, compound interest.
 - Liquidity: 20% deposit bonus for first 5 providers (min. 1,000 PHAND, max. 200 PHAND).
 - Referrals: 5% bonus on user activity (e.g., swaps, minted as new tokens, max. 1,000 PHAND/referrer/tx, owner-controlled).
 - Governance: Potential long-term governance exploration (2027+), currently centralized under founder control.
- **Mechanisms:** Anti-whale limits (1% transaction, 2% wallet); no built-in burn, but community-voted deflation possible. No transaction tax (gas only).

Chapter 6

Team

The PaperHands project is led by a dedicated solo founder under the PaperHands Development Team, focused on high-yield decentralized finance (DeFi) and meme-driven growth.

- **AnonDev (Founder & Lead Developer):** 2–3 years in blockchain development, specializing in ERC-20 tokens and referral/staking systems. Deployed multiple contracts on Ethereum, emphasizing fair distribution and high returns.

Chapter 7

Roadmap

Phase	Timeline	Milestones
Phase 1: Launch	Q4 2025 (Oct)	Token deployed (Oct 7), Uniswap/Balancer pools (\$ 319 liquidity, targeting \$ 5,000–\$ 50,000), staking dApp live (https://phands-staking-dapp.vercel.app), 100 PHAND airdrops for first 10 Telegram joiners, Telegram growth (1,000+ members).
Phase 2: Growth	Q1 2026	5,000 holders, referral program scale-up, Certik audit, X/Telegram campaigns, 20% deposit bonus campaign.
Phase 3: Expansion	Q2–Q3 2026	Ownership renounce to deactivate minting (Q2), CEX listings (e.g., KuCoin), DeFi integrations (Aave/Curve), liquidity pools to \$ 50,000–\$ 100,000, 10,000+ holders.
Phase 4: Maturity	2027+	50,000 holders, Layer 2 migration (e.g., Polygon), NFT staking or cross-chain features, potential governance exploration.

Table 7.1: Roadmap

Chapter 8

Risks and Mitigation

- **Market Risk:** Memecoin volatility – Mitigated by 20% APY and 5% referral incentives.
- **Technical Risk:** Contract bugs – OpenZeppelin libraries; Certik audit planned (Q1 2026).
- **Regulatory Risk:** EU MiCA compliance – Transparent design, legal consultation ongoing.
- **Adoption Risk:** Slow growth – Airdrops (100 PHAND for first 10 Telegram joiners) and 5% referrals for viral spread.
- **Inflation Risk:** Owner-controlled minting for referrals/airdrops (max. ~3–4% supply increase, e.g., 25,000 PHANDS for 25 referrers at 1,000 PHAND each) – Mitigated by owner-controlled limits, planned ownership renounce in Q2 2026, and potential long-term governance (2027+).

Chapter 9

Legal Disclaimer

This whitepaper is for informational purposes only and does not constitute financial, investment, or legal advice. \$PHANDS carries risks, including potential total loss due to market volatility. The project aims for compliance with EU MiCA regulations (2024). No guarantees of returns are provided. Conduct your own research (DYOR) and consult professionals. The team is not liable for losses.
